

Kit RV-WK28

REVERB™

This Reverb™ portable backlit exhibit system is designed to be used in a 10 x 20 inline booth space. It features (2) 10' sections, staggered, along with (2) freestanding podium units that can be used together or separately. Reverb™ uses a lightweight expanding aluminum framework with a backlit SEG dye-sub fabric on the front face (back wall and podiums) that uses an LED light curtain to illuminate the forward face. Sides of the unit feature a non-lit SEG fabric graphic. Reverb is backed by a lifetime warranty on the framework. This lightweight portable uses a soft-sided, wheeled duffel for transport (molded hard case shipping options are available).

FEATURES

Expanding aluminum framework with lifetime warranty

Easy assembly
