The Last Exhibit You'll Ever Buy

## Kit MQ-WK70

MULTIQUAD®

This MultiQuad® modular display system is designed to fit into a 30 x 30 island booth space. The lightweight aluminum framework requires no tools for assembly and carries a lifetime warranty. The unit features a main 20' long back wall that is tiered up to a maximum height of 16' and acts to broadcast messages on both sides as well as separate the internal area from the aisle. Within this wall is a provision for up to two 42" flush mounted monitors back to back. On the opposite side is another 20' long wall that is stepped to reach a height of 12' and provide for privacy within the core of the exhibit - where seating and semi-private conference areas can be set up. On opposite ends of the exhibit space are 46" high counter units that provide meet and greet areas and can be used for internal storage (as can either of the walls). All visible faces of the exhibit are covered with magnetically attached Quads that are easy to install, reposition, or change out as marketing messages evolve. These can be printed in any image or color. The unit packs down into individual frame components boxes that are then housed in a traditional crate and shipped common carrier.

### FEATURES

Lightweight framework that requires no tools and has a lifetime warranty

Easy to set up using Build By Numbers™ assembly system

Magnetically attached Quads with high impact graphics

Unit is easy to reconfigure, make larger or make smaller

Storage available within any framework by removing a Quad
