Kit MQ-WK72

MULTIQUAD®

This MultiQuad® modular display system is designed to be used in a 10 x 20 booth space and can be reconfigured to a smaller size if needed. The lightweight aluminum framework assembles without the need for tools and uses the Build by Numbers™ assembly system. The back wall features the ability to house up to a 42" monitor as well as has (2) double wide low showcase units with counter tops for product display. Overhead there is a down-lit canopy system at the monitor area. To the right there is an angles section, plus full height return side-wall, to create a semi-private conference area. Out front is a raised double width podium unit with down-lit showcase for product display. All front, inset, and visible sides are covered with high impact graphic Quads that easily magnetically attach to the framework. Storage can be had anywhere along the back wall by simply removing a quad and reinstalling. The unit ships common carrier in a traditional trade show crate - there is an option for molded wheeled cases that can ship FedEx or UPS.

FEATURES

- Lightweight framework that requires no tools for assembly and has a lifetime warranty
- Easy to assemble using the Build By Numbers system
- Magnetically attached Quads with high impact graphics
- Provisions for up to a 42" monitor
