

Kit SS-WK65

STRATOSPACE™

This StratoSpace™ lightweight modular hybrid exhibit is designed to fit within a 10 x 10 booth space. The aluminum framework assembles easily with the use of a torx style hex wrench and uses the Build by Numbers™ assembly system. The framework is backed by a lifetime warranty. The magnetically attached large format rollable center graphics are sized to help make installation easy while creating a branding opportunity. Semi-rigid graphic wing panels at the sides create visual interest and are sized for compact packing. The back wall features an overhead canopy system with downlighting as well as (2) attached table areas for product or demonstration. Out front is a freestanding meet & greet podium unit with storage capabilities. The unit ships via FedEx or UPS in molded wheeled cases.
