

h-line

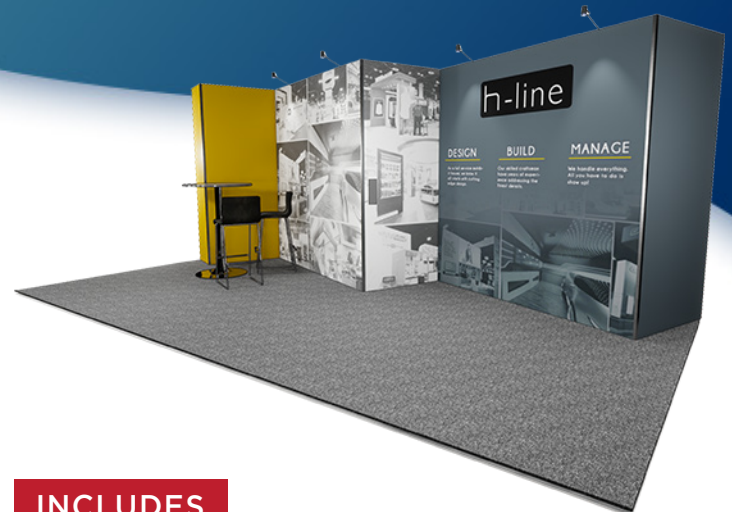

Kit HL-WK32

H-LINE

This h-line is designed to be used in a 10 x 10 inline exhibit space. The full-height lightweight aluminum framework with SEG dye-sub fabric graphic inserts provide a full image and branding canvas. Assembly is quick and easy with the Build By Numbers identification system as full sized elements go together without the use of tools. This unit can also be used as a 10 x 10 display. Lighting comes from four LED stem lights across the top. SEG dye-sub fabric graphics can be easily changed out for messaging updates. The stepped design provides rear storage as well as helps provide private areas within the booth space. Framework elements can be shipped with fabric graphics installed in a traditional trade show crate.

FEATURES

- Lightweight full height framework elements
- No tools required assembly is easily done
- Silicone Edge Graphics (SEG) can be easily changed out
- Reconfigurable
- Ships compactly in a traditional trade show crate
