

## Kit LV-WK75

LEVEL™

This LEVEL™ lightweight modular display system is engineered to fit within a 10 x 20 inline space. Made of up (2) 10' LEVEL modules, the left module includes graphics on the rear back wall, side inserts, floors, and surrounds, as well as (2) sliding GraphicGuides™ giving almost 18' of branding area, the right side features back wall and inset graphics, a single graphic guide as well as a sliding shelf glide and surrounds - for another 16' of image area. Both units have the built in plug-and-play LED standard lighting package that stays in place and provides brilliant downlighting. The units are stepped and create an eye appealing branding presentation. All graphic panels are magnetically attached to the framework. The unit requires no tools for setup and uses the Build By Numbers™ assembly system for ease of installation - only (6) major frame pieces. Units can be used together or as individual 10' units. Out front is a LEVEL free standing podium unit with lockable storage that will ship with one of the back wall modules. Each unit transports in a fully jiggged and slotted crate that ships via common carrier.
