MULTIQUAD®

This MultiQuad® modular display system is designed to fit into a 20 x 30 island booth space. The three tall towers (16') allow for branding on all sides and help eliminate the need for hanging signs or rigging. The lightweight aluminum framework assembles without tools using the Build By Numbers™ system. All framework components are backed by a lifetime warranty. The unit has several bridge areas tying in those tower units and helping to create three semi private meeting areas. There are provisions for up to 2 flush mounted 42" monitor units using MediaMount™. The entire structure is covered easily using magnetically attached Quads that can be printed with high impact graphics, text, or faux finishes. The freestanding podium unit provides for product demo areas, and storage can be accessed along any of the tower structures by simply removing and then replacing a Quad. Lighting comes from a series of LED stem lights positioned at the tops of the towers. The unit ships via common carrier in a traditional trade show crate.

FEATURES

Lightweight may equal savings in shipping and drayage

No tools required assembly - lifetime framework warranty

High impact printed Quads are easy to assemble or change out for new messages

Can be reconfigured for smaller sizes or added to for larger sizes

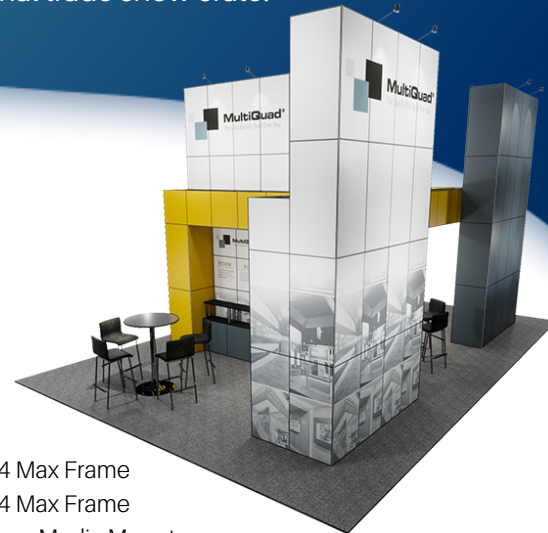

Incorporates flush mount monitors with Media-Mount

Prepackaged frame modules ship in a traditional trade show crate
