

Kit TH-WK90

THREADS™

This Threads™ lightweight portable display system is designed to fit within a 10 x 20 inline booth space. Each module's aluminum framework sets up without the need for tools and uses the Build By Numbers™ assembly system to help make it easy. All framework is covered by a lifetime warranty. The six Threads modules are covered on all four sides with a high impact dye-sub fabric graphic with hook and loop attachment and zippered enclosure. The modules sit next to one another and can be staggered, angled or flipped around to reveal a secondary message on the rear (or used within an island configuration). The unit easily reconfigures by moving, adding, or deleting modules. The unit ships via FedEx or UPS in molded wheeled cases.

FEATURES

Ultra-lightweight aluminum and fabric modules equal savings in shipping

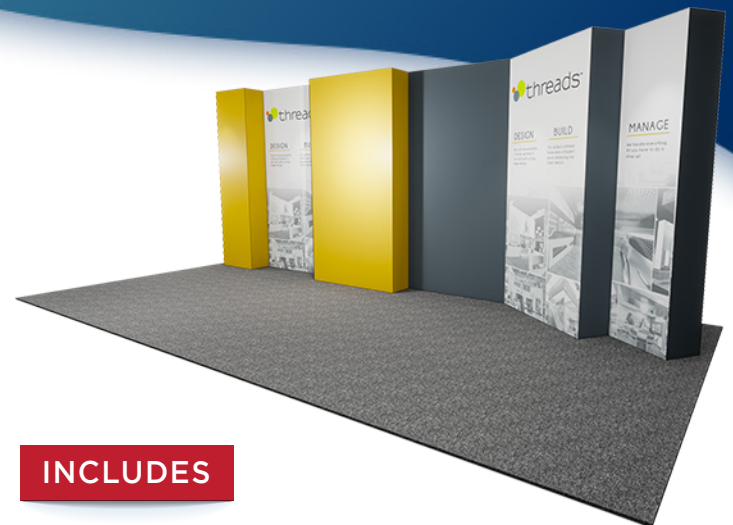

No tools required assembly

Lifetime frame warranty

Four-sided dye-sub graphics expand branding and are easily attached or changed out

Reconfigurable to smaller sizes

Ships FedEx or UPS in molded wheeled cases
