h-line

This h-line lightweight aluminum framed SEG dye-sub printed fabric display is designed to fit into a 20 x 20 exhibit space. The full sized h-line modules easily assemble without the need of tools. Likewise the silicone edge graphics are easy to install into the framework. The unit consists of a center (16') large monolith that can be branded on all four sides (as well as have storage capabilities). The full height opposing corner units provide semi-private conference use while on opposite corners there are L-shaped podiums that provide meet & greet or demonstration areas as well as provide storage. Lighting is provided by a series of LED stem lights to illuminate any imaging. The unit ships in traditional trade show crates via common carrier.

FEATURES

Lightweight aluminum framework with lifetime warranty

Dye-sub SEG fabric graphic panels provide high impact imaging

No tools required assembly

LED lighting

Lightweight framework and graphics equal savings in shipping

Components ship full height via common carrier in traditional trade show crating

Electronics, flooring and furniture are not included.
