

This h-line modular system is designed to fit into a 30 x 30 exhibit space and provide an open and inviting environment. The center tower provides branding while the six kiosks with overhead canopies create areas for product demonstration or meetings. The full sized, lightweight aluminum frame modules with high impact dye-sub printed SEG fabric graphics provide messaging and/or branding. SEG graphic skins are easily changed out as needed. The unit is a tool-less set-up and the framework is backed by a lifetime warranty. Freestanding podiums allow for meet and greet while counters can be used for demonstrations or product display.

### FEATURES

Lightweight aluminum framework reduces shipping and drayage costs.

No tools required assembly.

Lifetime warranty on framework.

High impact SEG graphics  
*(can travel on the frame)*

Can be reconfigured or added on to
