

# Kit SS-WK93

## STRATOSPACE™

This StratoSpace™ modular hybrid system is designed to work within a 10 x 10 inline exhibit space. The lightweight aluminum framework sets up easily using a small torx wrench using the Build By Numbers™ assembly system. The overhead canopy with LED down lighting illuminates the branding area on the back wall. The three magnetically attached rollable center panels with high impact graphics are easy to place and sized to be easy to handle. The four rigid wing panels in a variety of shapes provide branding and design elements. This back wall unit features a monitor mount as well as a small table area. Out front is a freestanding StratoSpace podium counter for meet and greet. This unit is designed to ship FedEx or UPS in molded wheeled shipping cases with foam inserts for product placement.
